

- 1 , on-board MAX485 chip , is a tool for RS-485 communications , low-power , Slew-Rate Transceiver
- 2 , onboard then 5.08 (mm) pitch 2P terminal for easy wiring RS-485 communication
- 3 , the chip has drawn all of the pins can be controlled by the microcontroller operation
- 4, Working voltage : 5V
- 5 , board size : 44 (mm) x14 (mm)
